### Working Temperature Range: -30 to +40 °C

Our dome tent has two-layer of cover fabric and insulation liner. it will be perfectly fitted in colder or hotter weather with the optional floor heating, air conditioning, fireplace, or other configurations.

### Wind Load: 80-120km/h

Our glamping dome tent has a solid foundation and can withstand level 12 typhoons, with a snow load of 0.30kN/m.

### Snow Load: 75kg/m2

The total static weight that can be supported over the entire dome is usually greater than any normal snow load it will have to support, as snow does not easily accumulate on a round roof.

### Life Span: Frames 15+ years, covering fabric 8-10 years

The lifespan of a tent mainly depends on the performance of the cover tarpaulin, which is generally 8-10 years of life. Our cover fabric is tear-resistant, durable, waterproof, fire retardant, mold-proof, and anti-corrosion.

### 100% waterproof; flame retardant to DIN4102 B1, M2, CFM; UV resistant, tear-resistant, self-cleaning ability, etc.

All the materials of our domes have passed the environmental testing of China.
